PROFILE

Final-year **Computer Engineering** student at ENSA Tangier, focused on **AI** (generative AI, ML, deep learning). Driven to build AI that people rely on every day, I am seeking a **final-year internship (PFE)**.

EDUCATION

Engineering Degree in Computer Science – Final Year ENSA Tangier 2022 – Present

PROFESSIONAL EXPERIENCE

Focus Next Computing
Casablanca, Morocco (hybrid) Jul. 2026 – Sep. 2026

Full Stack Developer | Intern

- Developed **FHIR**-compliant **Spring Boot** microservices, ensuring patient data interoperability.
- Integrated DICOM imaging (Orthanc PACS) through **Kafka**, with real-time result notifications (SSE).
- Secured the Patient and Lab Technician **React.js** portals with **Keycloak (OAuth2)** and SMART on FHIR.

Ceres Blockchain Solutions
Belgrade, Serbia (remote) Jul. 2025 – Sep. 2025

Full Stack Developer | Intern

- Built **Projexis** end to end (**Node.js, React, PostgreSQL**), centralizing HR management and workload tracking.
- Designed the data model (ERD) and **RESTful APIs**, providing a reliable and scalable foundation for the platform.

AI PROJECTS

Propel – Multi-Agent Job Application System Python, FastAPI, LangGraph, LangChain, ASP.NET, Angular 2026

- Designed a pipeline of **10+ LangGraph agents** automating the job search, from job offer to application.
- Developed an **LLM** abstraction layer unifying **5 providers**, with automatic model selection.
- Generated **CVs tailored to each offer** (LaTeX, PDF) and tracked applications on a kanban board (ASP.NET, Angular).

MoodLens – Facial Emotion Recognition TensorFlow/Keras, CNN, ONNX Runtime, OpenCV 2026

- Trained a **CNN** on **35,000 FER-2013 images** (7 emotions), with early stopping and an adaptive learning rate.
- Deployed it in real time with **ONNX Runtime** (no TensorFlow needed) and face detection through **OpenCV**.

Dirhamy – AI Financial Assistant TypeScript, Node.js, PGVector, RAG, Redis Team | 2025 – 2026

- Designed a **RAG** assistant over the user's own transactions (**PGVector** embeddings), with proactive alerts.
- **Cut API costs by 63 %** by grouping the recommendations for all of a user's goals into a single LLM call.
- Hardened API security (**JWT**, rate limiting), validated by an **OWASP ZAP** audit.

SKILLS & LANGUAGES

AI	LangGraph, LangChain, agents, RAG, Embeddings
Machine Learning	TensorFlow/Keras, CNN, OpenCV
Programming	Python, TypeScript, JavaScript, Java, C#, SQL
Backend & Web	FastAPI, Node.js, Express, Spring Boot, ASP.NET, React.js, Angular, Kafka
Data & DevOps	PostgreSQL, PGVector, Redis, MongoDB, Docker, Git, CI/CD, AWS
Methods	UML, Agile, Scrum, Jira
Languages	Arabic (native), French (C1), English (C1)

CERTIFICATIONS

Python for Data Science, AI & Development (IBM / Coursera) • **AWS Certified Cloud Practitioner** (in progress)

LEADERSHIP & AWARDS

Leadership	President of CSC ENSAT (80+ members), IaC mentoring, IT Day'z 2025 (External Relations) & 2026 (Advisor)
Hackathons	SoliHackathon ITWAVE 2025 (3rd place), Google Gemma 3n Impact Challenge, Blue & IDS Hackathons
Interests	Chess, video editing, AI tech watch, football, padel
