PROFILE

Final-year **Computer Engineering** student at ENSA Tangier, focused on **Data** (ETL, **Power BI**, machine learning). Driven to turn data into decisions, I am seeking a **final-year internship (PFE)**.

EDUCATION

Engineering Degree in Computer Science – Final Year ENSA Tangier 2022 – Present

PROFESSIONAL EXPERIENCE

Focus Next Computing
Casablanca, Morocco (hybrid) Jul. 2026 – Sep. 2026

Full Stack Developer | Intern

- Developed **FHIR**-compliant **Spring Boot** microservices, ensuring patient data interoperability.
- Integrated DICOM imaging (Orthanc PACS) through **Kafka**, with real-time result notifications (SSE).

Ceres Blockchain Solutions
Belgrade, Serbia (remote) Jul. 2025 – Sep. 2025

Full Stack Developer | Intern

- Designed the data model (**ERD**) and **RESTful APIs** for **Projexis**, an HR platform (**PostgreSQL**).
- Created decision-support **dashboards** for management within an international team (**Agile/Git**).

DATA & AI PROJECTS

Business Intelligence & Data Engineering Power BI, DAX, SQL, Pentaho, OLAP 2025 – 2026

- Designed an end-to-end data pipeline: **Pentaho ETL**, a data warehouse and **SQL/OLAP** analyses.
- Modeled data in **star and snowflake schemas**, with **DAX** measures to compute business KPIs.
- Built interactive **Power BI dashboards** to track KPIs and support decision-making.

MoodLens – Facial Emotion Recognition Python, TensorFlow/Keras, CNN, ONNX Runtime 2026

- Prepared the data and trained a **CNN** on **35,000 FER-2013 images** (7 classes), with early stopping.
- Deployed it in real time with **ONNX Runtime** (no TensorFlow needed) and face detection through **OpenCV**.

Dirhamy – AI Financial Assistant PostgreSQL, PGVector, RAG, Embeddings Team | 2025 – 2026

- Designed a **RAG** assistant that queries the user's own transactions (**PGVector** embeddings).
- **Cut API costs by 63 %** by grouping the recommendations for all of a user's goals into a single LLM call.

SKILLS & LANGUAGES

Data & BI	Power BI, DAX, star & snowflake schemas, OLAP, ETL (Pentaho)
Programming	Python, SQL, TypeScript, Java, C#
Machine Learning	TensorFlow/Keras, PyTorch, CNN, ONNX Runtime, OpenCV
Generative AI	LangChain, LangGraph, RAG, Embeddings, LLM agents
Databases	PostgreSQL, Oracle Database, MySQL, MongoDB, PGVector, Redis
Tools & Cloud	Git, Docker, AWS, Azure, Jira
ERP & Methods	SAP, Odoo, Agile, Scrum, UML
Languages	Arabic (native), French (C1), English (C1)

CERTIFICATIONS

Python for Data Science, AI & Development (IBM / Coursera) • **AWS Certified Cloud Practitioner** (in progress)

LEADERSHIP & AWARDS

Leadership	President of CSC ENSAT (80+ members), IaC mentoring, IT Day'z 2025 (External Relations) & 2026 (Advisor)
Hackathons	SoliHackathon ITWAVE 2025 (3rd place), Google Gemma 3n Impact Challenge, Blue & IDS Hackathons
Interests	Chess, video editing, AI tech watch, football, padel
