SKILLS

WEB & BACKEND
TypeScript, JavaScript, Java, Spring Boot, C#, Node.js, FastAPI, React.js, Vue.js, Angular, Express.js, ASP.NET, Kafka, gRPC, Keycloak

AI & DATA
Python, RAG, LangChain, Power BI, Pentaho

DEVOPS & CLOUD
Git, Docker, CI/CD, Terraform, AWS

DATABASES & ORM
PostgreSQL, PGVector, MySQL, Oracle, Prisma

DESIGN & METHODS
UML, Figma, Agile, Scrum, DevSecOps

LANGUAGES

English	*C1 – Fluent*
French	*C1 – Fluent*
Arabic	*Native*

CERTIFICATIONS

- **Python for Data Science, AI & Development** – IBM/Coursera
- **AWS Cloud Practitioner** – In progress

INVOLVEMENT & ACHIEVEMENTS

- **CSC ENSAT President:** Computer Science Club, +80 members.
- **Mentoring:** IaC workshops (Terraform, Ansible) & monitoring.
- **SoliHackathon ITWAVE 2025:** 3rd place
- **Google Gemma 3n Impact Challenge**
- **Blue & IDS Hackathons**

EVENTS

- **IT Day'z 2025:** External Relations Officer.
- **IT Day'z 2026 (11th edition):** Advisor.
- **Organizing Committee:** 3D Impact, Problem Solving.

INTERESTS

- Hackathons, Chess, Video editing, AI watch, Football, Padel.

MOUHSSINE EL HAOUARY

COMPUTER ENGINEERING STUDENT

Engineering student in **3rd year** of **Computer Engineering** at **ENSA Tanger**, seeking a **final-year internship** focused on **Full-Stack, AI and Cloud**.
Building on my experience at **Ceres Blockchain Solutions** and **Focus Next Computing** and my role as **President of the Computer Science Club (CSC)**, I am ready to take on new challenges to continue improving my technical skills and leadership.

EDUCATION

Engineering Program – 3rd Year Computer Engineering — 2022 – Present
National School of Applied Sciences (ENSA), Tanger

Baccalaureate in Physical Sciences — 2021 – 2022
Alwahda High School, Oued Amlil · Honors: Very good

PROFESSIONAL EXPERIENCE

Full-Stack Developer - Internship: Focus Next Computing — Jul. 2026 – Sep. 2026
Casablanca, Morocco (Hybrid)

- Developed **Spring Boot** microservices (Patient, Laboratory, Notifications) natively based on the **FHIR** standard, ensuring data interoperability and atomic medical transactions.
- Integrated the **DICOM** standard and a PACS server (Orthanc) for imaging, orchestrated by a **Kafka** event bus for asynchronous result processing and real-time notification broadcasting (SSE).
- Built **React.js** web portals (Patient and Lab Technician spaces), secured by **Keycloak (OAuth2/PKCE)** with strict granular access control based on the **SMART on FHIR** specifications.

Full-Stack Developer - Internship: Ceres Blockchain Solutions — Jul. 2025 – Sep. 2025
Belgrade, Serbia (Remote)

- Full-stack development of **Projexis**, an internal platform for optimizing HR management and workload tracking (**Node.js, React.js, PostgreSQL**).
- Complete data architecture modeling (ERD) and design of robust **RESTful APIs**, ensuring the reliability of the technical solution.
- Created interactive decision-support **dashboards**, built with strong autonomy within an international team and integrated into an **Agile/Git** workflow.

ACADEMIC PROJECTS

DIRHAMY: Intelligent Financial Assistant — 2025 – 2026
AI Engineer

- Developed a personal financial chatbot based on **RAG** (PGVector, Embeddings, Groq API).
- Designed an intelligent recommendation engine that detects at-risk spending behaviors and issues proactive personalized alerts.
- Optimized API costs by reducing redundant calls.

Emotion AI: Facial Emotion Recognition — 2026
AI / ML Engineer

- Developed a real-time emotion detection system (**7 classes**) based on a Convolutional Neural Network (**CNN**) trained on the FER-2013 dataset.
- Exported the model to **ONNX** and integrated **OpenCV** for face detection, achieving **high accuracy** in emotion classification.

PROPEL: Multi-Agent Application Platform — 2026
Architect & Full-Stack Developer

- Developed a **CV generation agent** (LangChain, FastAPI) handling LaTeX/HTML/PDF rendering.
- Developed the CV-related service (microservices architecture) in **ASP.NET & Angular** with gRPC, API Gateway and Kafka.
- Complete AWS deployment with **Terraform & Ansible** (CI/CD, IaC).

Business Intelligence & Data Engineering — 2025-2026
Data Engineer

- Developed an end-to-end data pipeline integrating **ETL**, data modeling, SQL analysis and OLAP processing.
- Used **Pentaho** and **Power BI** to design data flows, KPIs and interactive dashboards.
